

DUVAS TECHNOLOGIES LTD

AIR QUALITY MONITORING TECHNOLOGY

Opportunity Overview

SIA Group is offering an excellent opportunity to purchase the intellectual property assets of Duvass Technologies Limited, which is the developer of a portable device to detect a multitude of gases through the use of ultraviolet absorption spectrometry for the purpose of monitoring air pollution.

The device is underpinned by the Company's patented technology, which facilitates the detection and analysis of 14 gases, including dangerous pollutants such as benzene, to parts per billion concentration levels in real time.

The Company's technology has been fully commercialised and has a strong track record of performance across a range of sectors including Oil & Gas and Environmental Protection, with further opportunities for commercialisation in the Defence and Emergency Incidents sectors.

Interested parties are requested to deal specifically with Emre Turan at SIA Group. Further information including access to a virtual data room can be provided upon execution of an NDA.

It is intended that a sale will be executed at the earliest opportunity and all expressions of interest must be registered by no later than **Tuesday 12pm (GMT) 3rd December 2024**, with final offers to be submitted no later than **Wednesday 12pm (GMT) 18th December 2024**.

Opportunity Highlights

- Fully commercialised technology developed over a 15 year period with investment of more than £6m to date.
- Patent portfolio which can be utilised as part of an offensive or defensive patent strategy.
- Take advantage of increasing global demand for environmental monitoring solutions, a sector which is expected to grow to \$18.6bn by 2029 due to increasing regulatory standards, environmental awareness and public health considerations.
- Offers are invited for the Company's intellectual property assets.

Assets For Sale

- Granted utility patent portfolio underpinning the Company's use of UV spectroscopy in the detection of gases.
- Source code underpinning proprietary software platform utilised by customers to review findings and to map the presence of gases.
- Organisational knowledge including build manuals, mechanical & engineering drawings.
- Registered trade mark portfolio.
- Domain name portfolio.

Deadline

All expressions of interest must be registered by:

**Tuesday 12pm (GMT)
3rd December 2024**

Offers to be submitted no later than:
**Wednesday 12pm (GMT)
18th December 2024**
